Special focus on Africa

# SEARCH

Use the main search box to find titles from our entire database. By default it will search titles available within your library by keywords.

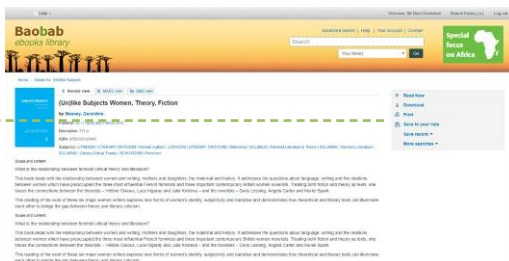

**NOTE:** Patrons can conduct a quick search using subject links on the left hand side of the page.

# READ NOW

After selecting the title, you will be redirected to the title page.

1. Select **'Read Now'** from the right hand side menu.

2. After selecting this option, the title opens in an online reader*. You are able to view single or double page spreads, magnify and return the title directly from the online reader.

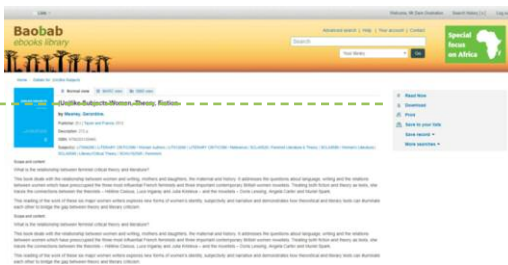

*Please make sure you have Flash Player installed on your device.
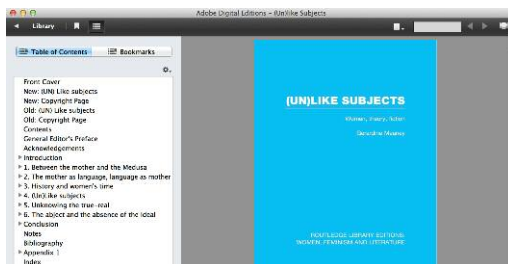

# DOWNLOAD

Download content into your compatible e-reader. This allows you to download for the period of the loan, after which the title expires and the patron can no longer access the content.

1. Select **'Download'** from the right hand side menu.

2. The title will be downloaded into your e-reader, which you can access offline.
